You might have deleted the photos or any other files due to some reasons and then you cannot access those files anymore. You can get into that situation easily without having to go through much trouble. All you need to do is to follow the steps which will be given below. How to Recover Your Deleted Files? On Windows PC, there are many solutions available for the people who want to get their deleted files back. If you have the latest version of Windows, then Microsoft has included an inbuilt tool in their operating system for the purpose of recovering deleted files. In this process, you need to follow the steps. You will be provided with a detailed step by step guide through which you can easily recover your files. Steps for recovering the files: Step 1. Open the 'Recover' option from the Windows Start menu. Here, you will see two options i.e. 'Recover deleted files' and 'Recover deleted files from Recycle bin'. Choose 'Recover deleted files' option in this. Step 2. Now, a window will appear where you have to select the drive on which you want to recover your files. After that, you have to select the type of file you want to recover from the available options. Click on 'Next
